Blood and Marrow Transplant Outpatient Services

Our blood and marrow transplant care area offers enhanced efficiency and convenience by bringing together in one location exam and treatment services, including limited-access areas for those at risk for infection.

Care areas
- Exam rooms designed to meet the needs of patients
- Treatment rooms that offer a serene environment for receiving care
- Limited-access rooms to ensure patient protection from infection
- Protected limited-access entrance for patients at risk for infection
- Social work, psychologists, laboratory and financial services are also inside the BMT area

Your dedicated and specialized BMT team
Each time you visit our BMT outpatient clinic, you will have a team of specialized caregivers dedicated to serving you. Your team includes a physician, nurses and support staff. All staff members work together to ensure your safety, comfort and continuity of care.

Tips for a successful visit
Your cooperation with the following guidelines will ensure seamless care and protect all patients from exposure to infection:
- Arrive on time for your scheduled appointment. Do not arrive early, as this will only increase your wait time.
- Wash your hands before entering the BMT area. Automatic, no-touch sinks are located at the main clinic entrance.
- Sign in with registration staff.
- Let our staff know if you are not feeling well. We will use all resources available to make you as comfortable as possible.
- Our staff will direct you to waiting rooms and care areas. Please remain in these areas until you are asked to change locations.
- If you are at high risk for infection, a staff member will instruct you to use the limited-access entrance instead of the main entrance to the BMT care area.

For patient appointments:
913-588-1227 | 844-323-1227
kucancercenter.org/bmt
Richard and Annette Bloch Cancer Care Pavilion
2650 Shawnee Mission Pkwy.
Westwood, KS 66205
